

Quenched and tempered special structural steels cut from hot strip with excellent cold forming properties

- Dimensions available: thickness ≤ 10 mm, width ≤ 2000 mm
- minimum tonnage of 20 to 30 tons, no individual plate production

Advantages for construction and processing:

- **Very narrow tolerance**
(Gesamtdickentoleranz innerhalb eines Bleches: $\Delta d \leq 0,1\text{mm}$)
- **Very good flatness** (≤ 3 mm/m)
- **High surface quality**
- **Excellent mechanical properties**
(minimum yield strengths up to 1100 MPa, minimum hardness values up to 500 HB)
